

PRASHANT MAURYA

Greater Noida, UP, India | +91 9140020725 | prashantpiyush1111@gmail.com | linkedin.com/in/prashantpiyush1111 | github.com/prashantpiyush1111

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building scalable backend systems, RESTful APIs, and responsive web applications using Spring Boot, Hibernate, Microservices, and MySQL. Active open-source contributor to a production Spring Boot codebase (JWT refresh-token security fix, merged PR), with hands-on experience in Spring Security, JWT authentication, RAG/AI-integrated systems, CI/CD, and Agile development. Strong foundation in OOP, SOLID principles, and Data Structures and Algorithms.

TECHNICAL SKILLS

- **Languages:** Java, Python (Basics), C++
- **Backend:** Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, JDBC, REST APIs, Microservices, JWT, BCrypt, Maven
- **Frontend:** HTML5, CSS3, JavaScript, React.js, Bootstrap, Responsive Web Design
- **Database:** MySQL, SQL, Query Optimization, Database Normalization
- **Concepts:** OOP, SOLID Principles, DSA, Collections Framework, Multithreading, Exception Handling
- **Tools & Practices:** Git, GitHub, GitHub Actions (CI/CD), Postman, IntelliJ IDEA, VS Code, Agile, Scrum

OPEN SOURCE CONTRIBUTIONS

vault-web (*Production Spring Boot Project*) — github.com/prashantpiyush1111

- Identified and filed a security issue exposing a refresh-token replay vulnerability in the authentication flow.
- Implemented the fix using a rotation-tracking (**rotatedAway**) strategy to detect and block reused refresh tokens; PR reviewed and merged.
- Debugged and resolved a follow-up integration test failure in the replay-detection logic post-merge.

INTERNSHIP EXPERIENCE

Java Full Stack Developer Intern

Feb 2026 – May 2026

AMDOX Technology Pvt. Ltd. — Bengaluru, India

- Trained on TaskManagement System — a microservices app covering service design, JWT auth, role-based authorization, and inter-service REST communication.
- Developed 10+ REST APIs using Spring Boot, reducing manual processing time by 25%.
- Integrated Hibernate ORM across 4+ modules for efficient entity mapping and faster data retrieval.
- Optimized 15+ SQL queries using indexing and normalization, improving backend efficiency by 20%.
- Managed 20+ Git commits in Agile sprints via pull requests, branching strategies, and code reviews; performed API testing via Postman.

PROJECTS

RAG-Based Educational System (*Final Year Project*) | *Python, Spring Boot, React.js, JWT, RBAC*

- Built a Retrieval-Augmented Generation (RAG) system with a Python AI service, Spring Boot backend, and React frontend for context-aware educational Q&A.
- Implementing Spring Security with JWT authentication and Role-Based Access Control (RBAC) to secure backend endpoints.

Spring Boot Production Patterns | *Spring Boot, Resilience4j, Redis, GitHub Actions*

- Built and published a reference repository of 10 production-grade patterns — Circuit Breaker, Rate Limiting, Retry Logic, Idempotency, Caching, Bulkhead, Health Check, Throttling, Graceful Shutdown, and Dead Letter Queue.
- Set up a CI pipeline, versioned GitHub releases, and a project Wiki; authored an accompanying Dev.to technical article.

Nestify — PG Management System | *Spring Boot, Hibernate, Spring Security, JWT, MySQL*

- Architected backend supporting 100+ tenant records with 15+ RESTful APIs, JWT auth, BCrypt hashing, and role-based access for Admin and Tenant users.
- Conducted a security audit and hardened the system — fixed privilege escalation, tightened security config, and removed hardcoded credentials.

EDUCATION

IEC College of Engineering and Technology

Greater Noida

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2023 – 2027

- CGPA: 7.74 / 10
- Coursework: Data Structures and Algorithms, DBMS, OOP, Operating Systems, Software Engineering, Computer Networks

CERTIFICATIONS

- JPMorgan Chase & Co. — Software Engineering Virtual Experience | Generative AI for Beginners
- SQL and Database Management | Web Development Fundamentals

ACHIEVEMENTS

- Delivered 4+ production-ready full stack applications with secure authentication, REST APIs, and relational database workflows.
- Solved 190+ Leetcode problems focusing on optimization, recursion, and algorithmic thinking; maintained 5+ public GitHub repositories with semantic versioning and CI workflows.
